

Aggregation of products in the cart to get the total price in the cart, when a product is added or removed:

```
const totalPriceRes = await cartCollection.aggregate([
  { $unwind: "$products" },
  {
    $group: {
      _id: "646a0b2cde06068eacbda790",
      totalPrice: { $sum: "$products.price" }
    }
  }
]).toArray();
```

//If the cart item already exists, add the product to its 'products' array

```
await cartCollection.updateOne(
  { _id: "646a0b2cde06068eacbda790" },
  {
    $push: {
      products: {
        id: productId,
        name: product.name,
        price: product.price,
      },
    },
  }
);
} else {
  // hvis den cart item ikke findes, så laver den en ny med produktet
  const cartItem = {
    _id: "646a0b2cde06068eacbda790",
    products: [{ name: product.name, price: product.price }],
  };
  await cartCollection.insertOne(cartItem);
}
```
